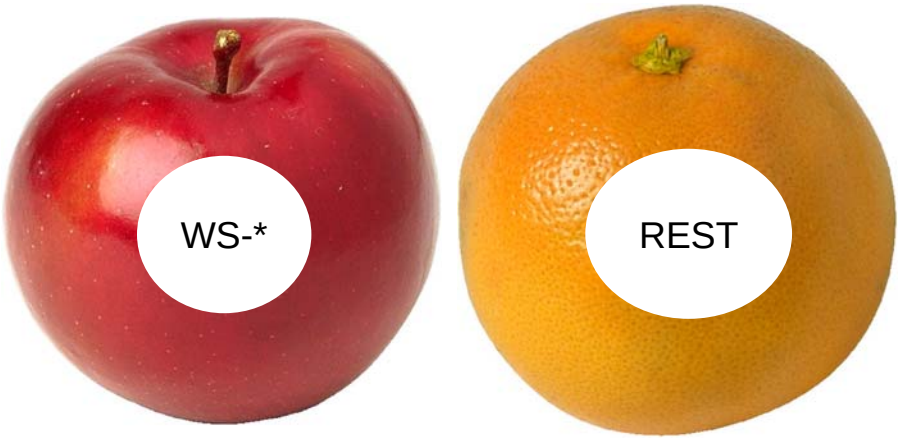
Is REST being used?

Slide from Paul Downey, BT

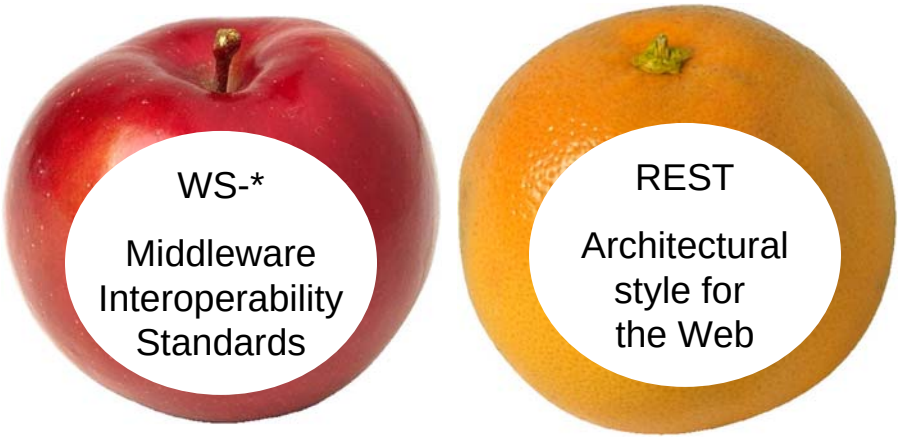
Università della Svizzera italiana | Facoltà di scienze informatiche

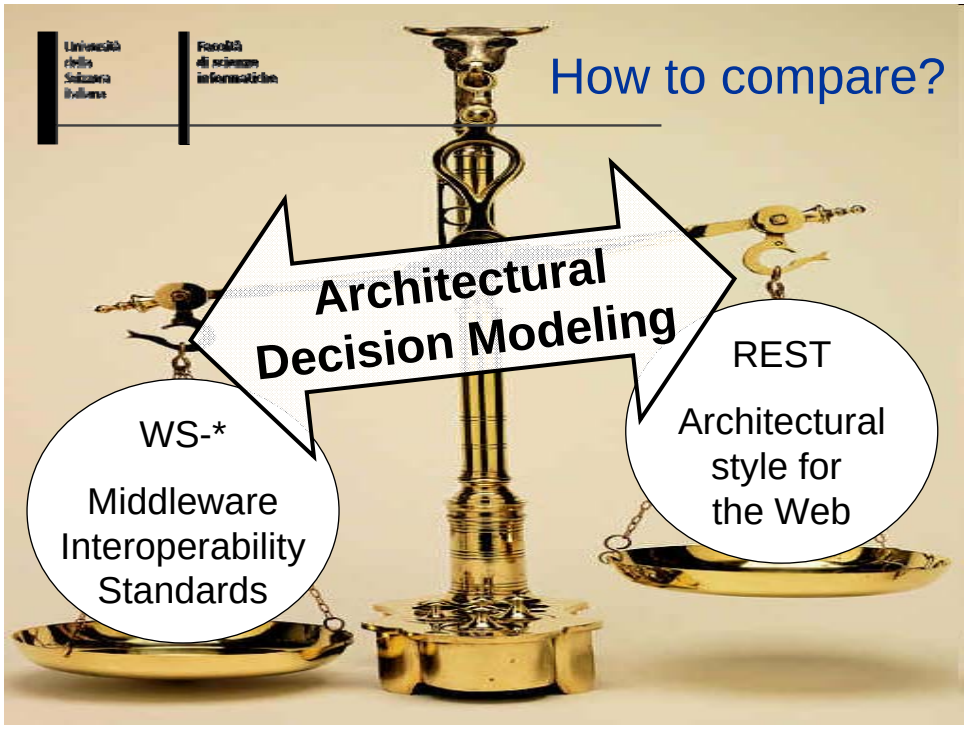
Can we really compare WS-* vs. REST?



Università della Svizzera italiana | Facoltà di scienze informatiche

Can we really compare WS-* vs. REST?





Università della Svizzera italiana | Facoltà di scienze informatiche

Architectural Decisions

- Architectural decisions capture the main design issues and the rationale behind a chosen technical solution
- **The choice between REST vs. WS-* is an important architectural decision for integration projects**
- **Architectural decisions affect one another**

Architectural Decision:
Communication Protocol

Architecture Alternatives:
1. TCP
2. SMTP
3. HTTP
4. MQ
5. BEEP
6. CORBA IIOP
7. ...

Rationale

Location (Dynamic Late Binding)	(✓)	✓
Service Evolution:		
Uniform Interface	✓	
XML Extensibility	✓	✓
Total Principles Supported	**3**	**3**

Table 1: Principles Comparison Summary

Università della Svizzera italiana | Facoltà di scienze informatiche

Outline

21 Decisions and 64 alternatives

Classified by level of abstraction:

- 3 Architectural **Principles**
- 9 **Conceptual** Decisions
- 9 **Technology**-level Decisions

Decisions help us to **measure the complexity** implied by the choice of REST or WS-*

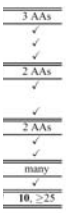

Table 2: Conceptual Comparison Summary

Table 1: Principles Comparison Summary

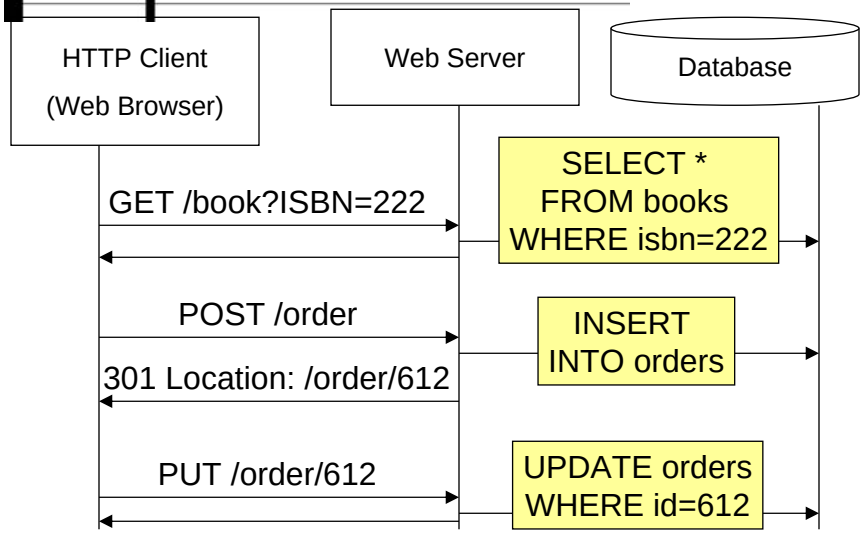
Università della Svizzera italiana | Facoltà di scienze informatiche

Architectural Principles

1. Protocol Layering
   - HTTP = Application-level Protocol (REST)
   - HTTP = Transport-level Protocol (WS-*)
2. Dealing with Heterogeneity
3. Loose Coupling

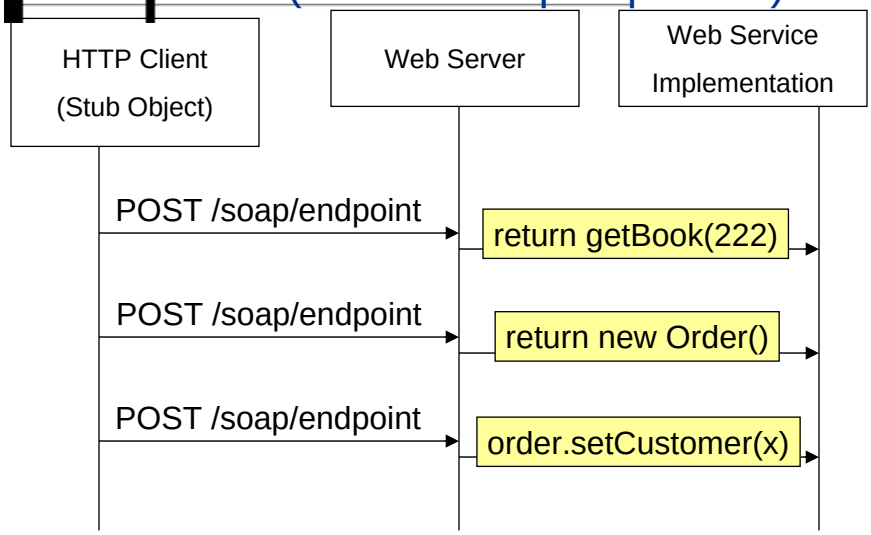
Università della Svizzera italiana | Facoltà di scienze informatiche

RESTful Web Service Example



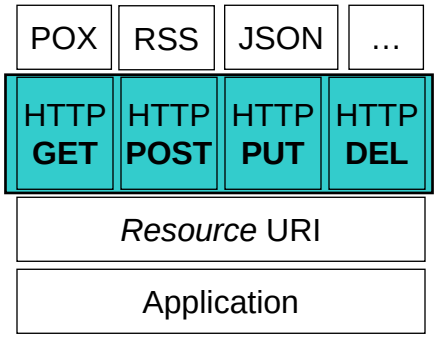
Università della Svizzera italiana | Facoltà di scienze informatiche

Big Web Service Example (from REST perspective)

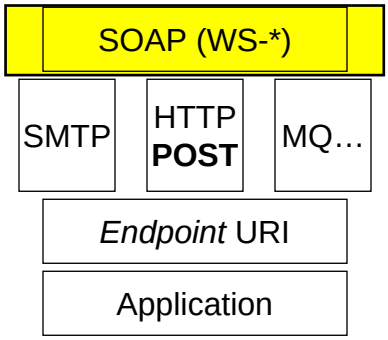


Protocol Layering

- "The Web is the universe of globally accessible information" (Tim Berners Lee)
  - Applications should publish their data on the Web (through URI)



- "The Web is the universe (tunneling) transport for messages"
  - Applications get a chance to interact but they remain "outside of the Web"



Dealing with Heterogeneity

- Web Applications

- Enterprise Computing

Measuring Complexity

- Architectural Decisions give a **quantitative measure** of the complexity of an architectural design space:
  - Total number of decisions
  - For each decision, number of alternative options
  - For each alternative option, estimate the effort

	REST	WS-*
Decisions	17	14
Alternatives	27	35

Decisions with *1 or more* alternative options

Università della Svizzera italiana | Facoltà di scienze informatiche

Measuring Complexity

	REST	WS-*
Decisions	**5**	**12**
Alternatives	**16**	**32**

Decisions with *more than 1* alternative options

	REST	WS-*
Decisions	17	14
Alternatives	27	35

Decisions with *1 or more* alternative options

Università della Svizzera italiana | Facoltà di scienze informatiche

Measuring Complexity

	REST	WS-*
Decisions	5	12
Alternatives	16	32

Decisions with *more than 1* alternative options

- URI Design
- Resource Interaction Semantics
- Payload Format
- Service Description
- Service Composition

Università della Svizzera italiana | Facoltà di scienze informatiche

Measuring Complexity

	REST	WS-*
Decisions	5	12
Alternatives	16	32

Decisions with *more than 1* alternative options

	REST	WS-*
Decisions	12	2

Decisions with *only 1* alternative option

Università della Svizzera italiana | Facoltà di scienze informatiche

Measuring Complexity

- Payload Format
- Data Representation Modeling

	REST	WS-*
Decisions	12	2

Decisions with *only 1* alternative option

Università della Svizzera italiana | Facoltà di scienze informatiche

Measuring Effort

	REST	WS-*
Do-it-yourself Alternatives	5	0

Decisions with **only** *do-it-yourself* alternatives

	REST	WS-*
Decisions	12	2

Decisions with *only 1* alternative option

Università della Svizzera italiana | Facoltà di scienze informatiche

Measuring Effort

	REST	WS-*
Do-it-yourself Alternatives	**5**	**0**

Decisions with **only** *do-it-yourself* alternatives

- Resource Identification
- Resource Relationship
- Reliability
- Transactions
- Service Discovery

Table 1: Principles Comparison Summary

Università della Svizzera italiana | Facoltà di scienze informatiche

Comparison Summary

- Architectural Decisions measure complexity implied by alternative technologies
- **REST simplicity** = freedom from choice
  - 5 decisions require to choose among 16 alternatives
  - 12 decisions are already taken (but 5 are *do-it-yourself*)
- **WS-* complexity** = freedom of choice
  - 12 decisions require to choose among 32 alternatives
  - 2 decisions are already taken (SOAP, WSDL+XSD)

Università della Svizzera italiana | Facoltà di scienze informatiche

Conclusion

- You should focus on whatever solution gets the job done and try to **avoid being religious** about any specific architectures or technologies.
- WS-* has strengths and weaknesses and will be highly suitable to some applications and positively terrible for others. Likewise with REST.
- The decision of which to use depends entirely on the application requirements and constraints.
- We hope this comparison will help you make the right choice.
